The Unicode Standard 3.1 - BETA

The characters in this file are PROPOSED for addition to The Unicode Standard, Version 3.1
See <http://www.unicode.org/unicode/alloc/Pipeline.html> for more information.

Preliminary information

This preliminary information is provided to allow implementers and font vendors to prepare for future additions to the standard and to allow interested parties to review the proposed additions for correctness. The Unicode Consortium does not guarantee that any or all of these characters will be added to the Standard now or in the future, nor that their reference shapes, character names and code positions will match the ones from this document. The information presented in these draft charts may be incorrect or substantially incomplete. It may be updated without warning.

The characters that are new for The Unicode Standard, Version 3.1 are shown in conjunction with characters that already exist in The Unicode Standard, Version 3.0. For ease of reference, the new characters have been highlighted in the charts and in the nameslist.

Caution

These characters have not been formally added to the standard. Use of these characters is at the implementer's risk. Some of these characters may not have been approved yet by the Unicode Technical Committee. They have not been finally adopted into ISO/IEC 10646-2. The UTC and ISO/IEC JTC1/SC2 (the subcommittee responsible for ISO 10646) synchronize the character repertoire and code points in their respective standard: characters are not added to one standard without being approved for the other.

See <http://www.unicode.org/unicode/alloc/Caution.html> for more information.
